

WHY DO IT?

Earning the CGC award will ensure that your dog is a well-respected member of your community. The Canine Good Citizen award is one of the first AKC certifies your dog can own and CGC provides an excellent foundation for all other training.

Some therapy dog groups require the CGC as a prerequisite for therapy work, there are CGC neighborhoods and hiking trails, and a number of state legislatures have endorsed the CGC concept.

Canine Good Citizen training is fun and useful. You'll find that training for the CGC award will help you establish a closer bond with your dog.

HOW DO YOU GET INVOLVED?

If you are a dog trainer, you can train your own dog for the CGC test. Another option is to enroll your dog in a basic training class to prepare for the CGC Test. American Kennel Club dog clubs, private trainers, pet super stores, 4-H groups, veterinarians, veterinary technicians, groomers and other experienced canine professionals can administer the CGC test. The AKC web site (www.akc.org) is an excellent place to go for a list of training clubs in your area, CGC evaluators or upcoming tests at AKC shows. If a canine professional in your area would like to become an evaluator, please have the person contact the AKC for assistance.

American Kennel Club CANINE GOOD CITIZEN[®] PROGRAM

An AMERICAN KENNEL CLUB Program

*... promoting responsible
dog ownership for owners
and basic training for dogs.*

THE AKC CANINE GOOD CITIZEN (CGC) PROGRAM WHAT IS IT?

The American Kennel Club started the Canine Good Citizen Program® in 1989 as a means of rewarding dogs who were well-behaved companions at home and in the community. The goals of the Canine Good Citizen program are to

- 1) teach responsible dog ownership to owners and
- 2) provide basic training and good manners to dogs.

A key component of the CGC Program is the 10-step CGC Test. All dogs (including purebreds and mixed breeds) who pass the CGC Test receive a certificate from the American Kennel Club.

ITEM #1: ACCEPT A FRIENDLY STRANGER

This test demonstrates that the dog will allow a friendly stranger to approach it and speak to the handler in a natural, everyday situation. The evaluator and handler shake hands and exchange pleasantries. The dog must show no sign of resentment or shyness, and must not break position or try to go to the evaluator.

ITEM #2: SIT POLITELY FOR PETTING

This test demonstrates that the dog will allow a friendly stranger to touch it while it is out with its handler. The dog should sit at the handler's side as the evaluator approaches and begins to pet the dog on the head and body only. The dog may stand in place to accept petting. The dog must not show shyness or resentment.

ITEM #3: APPEARANCE AND GROOMING

This test demonstrates that the dog will welcome being groomed and examined and will permit a stranger, such as a veterinarian, groomer or friend of the owner, to do so. It also demonstrates the owner's care, concern and sense of responsibility. The evaluator inspects the dog, then combs or brushes the dog, and lightly examines the ears and each front foot.

ITEM #4: OUT FOR A WALK (WALKING ON A LOOSE LEASH)

This test demonstrates that the handler is in control of the dog. The dog may be on either side of the handler, whichever the handler prefers. There must be a left turn, a right turn, and an about turn, with at least one stop in between and another at the end. The dog need not be perfectly aligned with the handler and need not sit when the handler stops.

ITEM #5: WALK THROUGH A CROWD

This test demonstrates that the dog can move about politely in pedestrian traffic and is under control in public places. The dog and handler walk around and pass close to several people (at least three). The dog may show some interest in the strangers, without appearing overexuberant, shy or resentful. The handler may talk to the dog and encourage or praise the dog throughout the test. The dog should not be straining at the leash.

ITEM #6: SIT AND DOWN ON COMMAND/ STAYING IN PLACE

This test demonstrates that the dog has training, will respond to the handler's command to sit and down, and will remain in the place commanded by the handler (sit or down position, whichever the handler prefers). The handler may take a reasonable amount of time and use more than one command to make the dog sit and then down. When instructed by the evaluator, the handler tells the dog to stay and walks forward the length of a 20-ft. line. The dog must remain in place, but may change positions.

ITEM #7: COME WHEN CALLED

This test demonstrates that the dog will come when called by the handler. The handler will walk 10-feet from the dog, turn to face the dog, and call the dog. The handler may use encouragement to get the dog to come. Handlers may choose to tell dogs to "stay" or "wait" or they may simply walk away, giving no instructions to the dog as the evaluator provides mild distractions (e.g., petting).

ITEM #8: REACTION TO ANOTHER DOG

This test demonstrates that the dog can behave politely around other dogs. Two handlers and their dogs approach each other from a distance of about 15-feet, stop, shake hands and exchange pleasantries, and continue moving. The dogs should show no more than a casual interest in each other.

ITEM #9: REACTIONS TO DISTRACTIONS

This test demonstrates that the dog is confident at all times when faced with common distracting situations, such as the dropping of a large book or a jogger running in front of the dog. The dog may express a natural interest and curiosity and/or appear slightly startled, but should not panic, try to run away, show aggressiveness or bark.

ITEM #10: SUPERVISED SEPARATION

This test demonstrates that a dog can be left with a trusted person, if necessary, and will maintain its training and good manners. Evaluators are encouraged to say something like, "Would you like me to watch your dog?" and then take hold of the dog's leash. The owner will go out of sight for 3 minutes. The dog does not have to stay in position but should not continually bark, whine, or pace unnecessarily, or show anything stronger than mild agitation or nervousness.
